SPECIAL APPLICATIONS

QUICK PURCHASE ORDER

The **Quick Purchase Order** system increases efficiency and accuracy by enabling technicians to call in purchase orders from the field. The system automatically posts all items to the corresponding work order and is fully integrated with the Inventory and Accounts Payable systems.

- ◆ Access the Quick Purchase Order procedure directly from the call-taking screen or the Purchase Order system.
- ◆ Ensure that items/materials purchased in the field are posted directly to customers work order.

FLAT RATE BOOK INTERFACE

The **Flat Rate Book Interface** system provides an interface to industry standard flat rate books such as Maio and Collier in order to set up and maintain your inventory. The system provides you with customized price updates and current bill of material information insuring that the data stored in your inventory file is always up to date.

- ◆ Save time and increase efficiency by eliminating time-consuming tasks such as identifying inventory items, writing descriptions, obtaining current pricing, and updating all of the above information in the system.
- ◆ Produce critical information on-screen with the press of a key.
- ◆ Update pricing and costing information automatically to the Inventory Control system.
