

# CONTRAC2

## C2 CONNECT

CONTRAC2 Connect opens the door to a world of possibilities allowing you to access centralized CONTRAC2 data through Microsoft Access, Excel, Crystal Reports, and other popular ODBC compliant packages.

CONTRAC2 Connect includes:

- 32-Bit Client ODBC Driver
- Data Dictionaries for CONTRAC2 data files

The Data Dictionary is provided for all CONTRAC2 modules, giving you access to:

- Service History
- Jobsite Data
- Customer and Vendor History
- Invoice Information
- Payroll
- Job History, etc.

You can export your data and create Windows based spreadsheets and reports. You can also do things you can't do within CONTRAC2, such as producing graphical images (pie charts, bar graphs, pictures, etc.).

Knowledge of Access, Excel, and other third party ODBC related software products is assumed to make full use of C2 Connect.

## C2 FAX

The C2 Fax system increases your efficiency by reducing the time it takes to fax information. Eliminate the time wasted printing and faxing items manually through the fax machine.

C2 Fax enables you to view information such as:

- a particular screen
- report
- memo
- or any other printable information

and fax it directly to your destination without ever having to leave your desk.

The C2 Fax system has the capability to fax items with graphical overlays such as:

- purchase orders
- requests for pricing
- invoices

and your company logo on cover sheets, resulting in a professional copy every time.

## C2 FILE

Eliminate excessive paperwork and disseminate information quickly and easily with C2 File.

C2 File enables you to scan field paperwork such as service orders and work orders. While entering work order information, a single keystroke will launch a pop up window containing the current work order, service order, and invoice numbers. The operator then hits the scan key.

C2 File can scan single or multiple pages for each work order and has the capability to scan in batch mode.

Job cost documents such as progress-billing invoices can also be scanned.

Documents scanned can be retrieved by any C2 File user by entering any one of the fields. If there is more than one document, C2 File allows you to browse through and select the correct one.

This exciting new product provides a simple way to furnish a customer with copies of original field paperwork by e-mail or fax.
